

PROTECH TRANSPORT

- The next-generation technology that enables AI to cognize information on its own by learning, extracting and processing specific information using defined object data.
- The solution has the goal to solve the traffic congestion and ensure traffic safety, applying to the transportation sector of Smart City.

PROTECH FACTORY

- Smart Video Surveillance for safety in factory
 - Fire & smoke detection
 - Absence of protective equipment detection
 - Rollover and narrowness detection
 - Gas leak detection
 - Night time movement detection for anti theft

PROTECH FACE AI

- Provide complete visual perception system and data analysis system as well as the software and hardware integrated open platform.
 - Customer traffic statistic
 - Customer attributes
 - Member recognition
 - Blacklist and VIP alerts

PROTECH THERMAL

- Military standard.
- A comprehensive range of night vision and thermometric solutions.
- Combined with high-grade stainless steel housing made with molding technique for a life-time durability against corrosion.

PROTECH SURVEILLANCE

- Bringing latest technology: Artificial Intelligence, Spectra, 4K
- Spectra Technology enables all Protech cameras to produce bright videos with colorful details even in extremely dark environments. **The Key Benefits** : Color Information as Exact Condition, Accurate color rendering, Top performance in dark environments, Bright color information and richer details, Balanced brightness
- Scalable
- Value for money

PROTECH BUILDING

- Smart Things Sensors. Connect to the Smart Things Hub to create your smart home.
 - Receive alerts when there's unexpected activity in your home.
 - Set connected lights to turn on and off as people come and go.
 - Monitor moisture and temperature.
- SmartThings Outlet
 - Control lights, electronics, and small appliances from anywhere.
 - Set devices to turn on and off at different times of day.
